

How is your truck scale program?

EASTERN CONTECH

BUILDING SCALE FOUNDATIONS
SINCE 1990

RAISE YOUR...

BOTTOM LINE.

For over 18 years, Eastern ConTech has been providing hassle free construction to scale companies all over the country. Increasing your truck scale sales and your bottom line are our goals.

With a satisfied customer base of every major manufacturer in the US as well as their dealer and distributor network, you can rest easy while we take care of all your construction needs.

Do your own construction?

Most of our customers have, at some point in time, tried their hand at construction to make an effort of increasing their own bottom line. Meanwhile, sacrificing valuable billable hours that your technicians are properly trained for.

Have you ever had a catastrophic form failure? Does this keep you up at night? This creates a multitude of issues, from customer dissatisfaction to cost overruns. You can't budget failures in your next project. **we can do it better!**

When we are not building your scale foundation, we are attending seminars and trades shows to learn how to make your project more profitable through advancements in cement, concrete additives, tools and equipment. Let our forward thinking work for you.

CONCRETE RAMP WITH CUSTOM FLARE AND BOLLARDS

DEMOLITION WITH A TEMPORARY SCALE

LOW PROFILE RAILROAD SCALE FOUNDATION

We also offer a fully electronic portable truck scale. Equipped with siderails, indicator and printer.

Our portable scale is stored on a 48' semi flatbed trailer and is ready to mobilize when you need it.
